

ZIPPER TUBING.

REGULAR TRACK

NEW Z-TRACK

AVAILABLE IN 2 TRACK TYPES **Regular Track** For normal closure applications. Can be closed by simply pressing together.

New Z-Track Designed to give maximum flexibility without permanently sealing the track. Allows re-workability, modifications, repairs, additions by simply unzipping and rezipping.

GP Zippertubing® is a flexible, reliable jacket for general applications. Made of tough virgin materials, GP is a polyvinyl chloride compound that will take up to 105 degrees C and conforms to Mil 1-631D, Grade A and C.

SHN Zippertubing® offers nearly 100% R.F.I. shielding and protection of multi-conductor wires and cables. SHN is a lamination of vinyl impregnated Nylon cloth and aluminum foil, with tinned copper braid attached to inside overlap for a gasket-like seal and a solderable termination point.

MCT Multiple Channel Tear-Seal Zippertubing® permits fabrication of ribbon-type cable using standard production methods. Custom break-outs are feasible without the use of special T's, Y's, forks or special boots. Standard Z-Track closure offers easy accessibility for repairs or modifications.

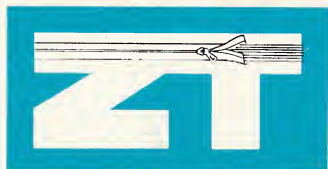

Protective splice covers of polyvinylchloride can be wrapped around spliced areas in a matter of seconds and zipped closed. All seams are watertight and when the ends are clamped or taped to the cable, an effective moisture barrier is created.

ZT Protector Boot is designed for use with three separate connectors or break-outs. You save up to 90% installation time with these zip-on jackets. Zipper tract can be permanently sealed with ZT sealer or left unsealed for easy repair and design changes.

Like to know more about Zippertubing®? We wrote a book about it. It's yours for the asking!

Design Service. Skilled Zippertubing® engineers are at your service in the designing of intricate configurations that will offer you the best, most economical method of obtaining the protection you require.

Special Consultation. At your request, our Field Engineer will call or you can mail your design concept to us for evaluation and quotation. All requests confidential.
